Investment Objective

The investment objective is to ensure that returns on policyholder's funds are consistent with the protection, safety and liquidity of such funds, while ensuring that the liabilities in respect of each of the funds are supported by a diversified pool of investments and assets, held under the respective fund wherein the asset classes, asset allocation and asset selection are compliant with the nature of liabilities, investment objective for each of the funds and, IRDAI Investment Regulations and Insurance Act.

Investment Objective

There are well-defined categories of funds across the risk-return spectrum. Based on the objectives and risk return profile of each fund, investments are made in various assets classes like equity and debt. The Investment team is adequately staffed and structured for effective management of respective funds and also to ensure independent checks and monitoring of investment performance. A process driven and moderate risk approach is followed. While choosing stocks in portfolio, the business model, competitive edge, management quality, sustained economic earnings, and corporate governance is assessed. The equity portfolio has a bias towards industry leaders and growth companies. In case of debt, emphasis and focus is on safety, liquidity and returns with prime importance given to duration management with a view on interest rates.

Risk Control

Investment risk is managed by creating a portfolio of different asset classes and of varied maturities depending on the fund objective so as to spread risk across a wide category of the investee companies, groups as well as the industries in accordance with the prudential exposure norms and regulation stipulated by the IRDA. Investment Committee which acts as the policy making body for the investment operations, periodically discusses the investment strategy, portfolio structures, performance of the portfolio and other issues relating to the investment portfolio. The Asset & Liability Management Committee reviews the asset liability management strategy, investment risk, and other related risks periodically. The Credit Committee approves the credit limit for each investee company and also does a periodical review of the existing exposure of debt investments in companies.

Year Gone By – Markets

FY19 was a volatile year for almost all asset class. Indian equities (Nifty50) were initially up 16.1% till Aug 18 then fell 14.6% in two months till Oct18 only to regain the lost ground and settle at 14.9% for the period. Nifty Midcap50 and Nifty Small cap indices underperformed Nifty50 by huge margin of 12.9% and 33.4% respectively. 10 year benchmark yields made a high of 8.18% in Sep 18 only to fall substantially by 82 bps to end FY19 at 7.35%. It made a low of 7.22% in Dec 18. USD INR initially depreciated 14.1% till Oct 18 but later on recovered and ended the year with 6.1% depreciation. Gold ended FY 19 with 2.5% loss in USD terms. After an upmove of 31.6% in FY 18, Crude was up another 24.1% till Oct18. However, from FY19 high of USD86.2/bbl in Oct 18 it fell 41.5% to make FY19 low of USD 50.5/bbl and finally settled at USD 68.4/bbl down 1.6% for the year. In FY19, FIIs (Foreign Institutional Investors) initially sold USD 6.7bn of Indian equities till Dec 18, however in the last quarter of FY19 they bought USD 6.85bn to end the year with minuscule net buy of USD0.16bn. DIIs (Domestic Institutional Investors) continued their buying in FY 19 with net buy of USD 10.3bn of Indian equities. FIIs sold USD 6.45bn of Indian debt

Q1 FY 19

Q1 started on good note with Indian equities up 5.9% (Nifty50) for the quarter. Strong domestic flows (USD 5.6bn), in line Q4FY18 corporate earnings, forecast of normal monsoon provided support to the market. On political front three-year old PDP-BJP coalition fell-out with the BJP withdrawing support from the party combine. The state is under Governor's rule with N N Vohra talking charge. The Karnataka state elections saw major political tussle between BJP and Cong-JD(S) combine, with BJP emerging as the single largest party but failing to establish the government.

On the macro front, GST revenues in April 2018 crossed Rs.1trillion for the first time. In May also collections continue to be robust at Rs 956 bn. 4QFY18 GDP surprised on the upside, printing at 7.7%, significantly higher than the government's advance estimate of 7.1%. The impressive year-on-year lift from 7% in 3QFY18 to 7.7% in 4QFY18 was helped by a very favorable base effect and strong support from the public sector. Notwithstanding this last-quarter boost, FY18E ended with GDP growth slowing to 6.7% from 7.1% in FY 17. Consumer Price Index (CPI) inflation increased 64 bps in the first quarter on back of core and fuel inflation.

10 year benchmark yield rose by a meaningful 50bps in the first quarter. This was on the back of RBI's hawkish stance and first rate hike coming after over 4 years and concerns on fiscal deficit due to rising crude oil prices which rallied 14% during the quarter to close at USD79.4/bbl. Rupee depreciated by 5.1% at 68.5 (vs. USD) on fears of widening trade deficit and strengthening of USD against major currencies. On global front, the US Fed raised its rates by 25 bps.

Q2 FY19

Q2 started on positive note with the benchmark Nifty50 Index crossing 11,700 mark for the first time in history (Nifty50 up 9% till August) aided by strong Q1FY19 reporting season and defeat of the no-confidence motion against the incumbent Government in Parliament. However, market sentiment were severely dented locally by deficient monsoons, concerns on widening trade deficit as crude prices rallied another 4% in the quarter and emerging concerns over credit and liquidity issues in the NBFC segment and potential contagion from herein and globally by escalation of trade tensions as the US announced tariffs on a further USD200bn of Chinese imports and rate hike by the Fed by another 25bps. As a result Indian equities ended the quarter with only 2.9% gain.

The default by Infrastructure Leasing & Financial Services (IL&FS), a large Financial Institution, took center stage at the end of the quarter. The current crisis which started as a credit event at IL&FS (with the company defaulting on its debt repayment obligations) had become both a credit and a liquidity issue for the financial sector. IL&FS (a AAA rated entity) has a consolidated debt of INR910Bn (USD12.54bn) (FY18) as per available data sources. The defaults were a consequence of very high leverage, asset liability mismatch and negative cash flows. Post the default by IL&FS and some redemption pressure seen in the case of a few Mutual Funds in their debt funds, there has been a ripple impact on credit spreads for NBFCs.

On the macro front, RBI raised the Repo rate by another 25 bps to 6.50% mainly due to concern on rising inflation. Q1FY19 GDP growth came in at robust 8.2%. During the quarter, the government announced sharp increases in MSP followed by announcement of GST rationalisation for several items in the GST council meet.

Continued macro pressures and rupee depreciation led to 10 year benchmark yield increasing by 12bps in quarter to 8.02%. The yields reached a high of 8.18% during the quarter. INR depreciated by 5.9% in the quarter and ended at 72.5/USD. Oil traded in a wide range (USD 71-82/bbl) in this period. Oil rallied in the second half of the quarter as expectations of tighter crude market resulting from American sanctions on Iranian crude outweighed the risk to demand from the ongoing U.S.-China trade dispute.

Q3 FY19

Indian equities started on weak note in October (Nifty50 down 5.0%). The selloff was driven by both local macro stress, amidst fears of tightening liquidity and additional liability issues particularly in the NBFC segment and the sharp correction in global equities driven by trade war fears. But with crude oil down 36% during the quarter and US Fed Chairman Mr. Powell's statement that the central bank's benchmark interest rate is "just below" neutral the investor sentiments were boosted and market recovered in November. December did see a bout of nervousness around state election results and the resignation of RBI Governor Dr. Urjit Patel but subsequently recovered as macro variables continued their favorable trend and ended flat for the quarter.

On the local front, at the beginning of the quarter, the Central Government announced INR 1.5 per litre cut in both gasoline and diesel excise duties while also asking the oil marketing companies (OMCs) to provide additional relief of Rs1 per litre. Assembly poll results were announced for 5 states in December with Congress emerging victorious, albeit of narrow margins, in 3 BJP incumbent states (MP, Rajasthan, Chhattisgarh) while Telangana went to TRS and Mizoram to MNF.

On macro front, 2QFY19 GDP growth slowed down to 7.1% from 8.2% in 1QFY19. RBI in its monetary policy meet maintained status quo on policy rates and made announcements of easing ECB hedging requirements thereby enabling larger banks to address the refinancing needs of NBFC. India jumped 23 notches to rank 77th in Ease of Doing Business Rankings, 2019 released by the World Bank, while also featuring as one of the top 10 improvers in this year's assessment.

10 year benchmark yield eased 65bps in the quarter to 7.4% on back of positive surprises on inflation (down 281 bps in six months), sell off in crude oil prices and RBI's decision to inject liquidity in the system through OMOs. Crude oil prices were below USD 60/bbl for the first time since October 2017. INR appreciated by 3.8% in the quarter.

Q4 FY19

Indian equities (Nifty50 -0.3%) started the quarter flat as they were impacted by a) reversal in Brent crude oil prices amid supply cuts, up 23% in Jan-Feb 2019, post 36% drop in 3Q19 b) slowdown in China c) premature ending of Trump-Kim summit in Hanoi with the 2 leaders failing to strike a deal d) mixed earnings season with disproportionate losses in some large companies e) negative sentiment on companies where promoters have significant pledged shares f) heightened geopolitical tensions between India and Pakistan following the Feb 14 militant attack on CRPF in J&K with both India and Pakistan engaging in aerial action. However in March the markets (Nifty50 7.7%) broke out on the upside from the narrow range bound trading in the previous 3-4 months due to a) renewed foreign inflows (Inflows of USD 6.9bn) b) sentiment boost from opinion polls ahead of general elections tilting further in favour of incumbent government, c) de-escalation in geopolitical tensions between India and Pakistan and d) optimism over US-China trade negotiations.

On the global front, China saw industrial output growth coming in at 17-yr lows, Theresa May failed to pass a Brexit deal through British parliament as the deadline for Mar 29 UK exit approached, US treasury yields slipped to 2017 levels on recessionary concerns in late March and the Fed continued to maintain a pause on its rate action with dovish policy moves.

GST Council doubled exemption limit and raised threshold for availing composition scheme providing relief to MSMEs. The rates on under-construction properties were cut to 5% (from 12%) and on affordable housing to 1% (from 8%) effective 1 April, 2019. However the developers of residential projects which are incomplete as on March 31 were given the option to either choose the old structure with Input Tax Credit (ITC) or to shift to the new 5% and 1% rates without ITC.

10 year benchmark yield was flat for the quarter. INR appreciated 0.9% during the quarter at 69.16/\$. Moderations in external pressures coupled with notable foreign net equity inflows post resurgence in global liquidity supported INR.
