## KOTAK SINGLE INVEST ADVANTAGE

Individual, Unit-Linked, Non-Par, Single Premium Life Insurance Plan

There are times when life can surprise you pleasantly with financial windfalls or unexpected rewards. Such surplus is normally spent by you over a period of time or it simply lies idle. However, an intelligent investment of such a lump sum amount can go a long way in ensuring a bright future for you.

Keeping this in mind Kotak Life Insurance brings to you **Kotak Single Invest Advantage**, a hassle-free unit linked plan, where you invest once and reap the benefits throughout the policy term. Coupled with easy liquidity and investment strategies to suit your investment objectives, this plan ensures that your investments work for you and not vice versa.

### Key Advantages

- Convenience of one-time payment
- Advantage of Loyalty Additions
- Option to choose from 3 Investment Strategies as per your Investment Objective

# How does this plan work?

## Convenience of One Time Investment

In this plan, a single premium enables you to enjoy the benefits of investment and insurance throughout the policy term. There is no obligation of future payments, which means that now you can sit back and relax.

## Advantage of Loyalty Additions

While your money remains invested, Loyalty Additions on your investment is an added advantage. Thus, your single premium earns extra for you and adds to the returns. The plan will add Loyalty Additions every 5 years starting from the end of 10th policy year (subject to policy being in force i.e. not in the Discontinued state), i.e. in a 10 year Policy Term the Loyalty Addition will be added at the end of 10th Policy year and for a 15 year Policy Term the Loyalty Additions will be added at the end of 10th and 15th Policy Year.

The Loyalty Addition will be as a %age of the average Fund Value in the immediately preceding three years. The rates will be dependent on the Single Premium bands and Policy Term as follows:

Single Premium Band (₹)	Loyalty Addition %	
	10 years term	15 years term
3,00,000 – 6,99,999	4%	5%
7,00,000 & above	5%	6%

## Option to choose from 3 Investment Strategies

Some of us might be aggressive and look for maximum equity exposure while others might be cautious and would like safety of capital and some of us not that comfortable managing the portfolios. Whatever be your investment style, Kotak Single Invest Advantage offers you investment strategies to match your risk profile, investment objective and comfort factor. You can work with the available strategies as per your risk taking capacity.

This plan offers you three Investment Strategies to choose from:

- 1. Self-Managed Strategy
- 2. Age Based Strategy
- 3. Systematic Switching Strategy (SSS)

## Strategy 1: Self-Managed Strategy

This strategy enables you to manage your investments as per your requirements “yourself”. Under this strategy, you have the following Fund Options to choose from in proportions of your choice. You can switch monies amongst these funds using the switch option.

Fund Options (SFIN)	Investment Objective	Risk-Return Profile	Equity	Debt	Money Market
Classic Opportunities Fund (ULIF-033-16/12/09-CLAOPPFND-107)	Aims to maximize opportunity for you through long-term capital growth, by holding a significant portion in a diversified and flexible mix of large/ medium sized company equities	Aggressive	75-100%	0-25%	0-25%

Money Market Fund (ULIF-041-05/01/10-MNMMKFND-107)	Aims to protect your capital and prevent downside risks	Secure	-	-	100%

## Strategy 2: Age Based Strategy

Your financial needs will vary at different stages of your life. Thus, it's necessary that your investment strategy has the capability to adapt to your changing needs. Age Based Strategy does exactly that, under this strategy the exposure to equity (Classic Opportunities Fund) & debt (Dynamic Bond Fund) will be based on your age (Life Insured's age) and opted Risk Appetite and will keep on changing basis your attained age and the Risk Appetite. The proportionate balance in the respective funds will be managed through Monthly Re-balancing of units.

This strategy offers three Risk Appetite options to choose from (a) Aggressive, (b) Moderate and (c) Conservative and the allocation of funds will depend on this and your age. Further you can change the mode of investment as per your changing Risk Appetite subject to term & conditions. This investment strategy is not applicable in last policy year as in the last year this strategy offers the feature of **Safety on maturity**<sup>1</sup>.

Allocation of monies under this strategy will be done between Classic Opportunities Fund and Dynamic Bond Fund.

**a) Aggressive Risk Appetite:**

Age of Life Assured (years)	Classic Opportunities Fund	Dynamic Bond Fund
0-25	80%	20%
26-35	70%	30%
36-45	60%	40%
46-50	50%	50%
51 onwards	40%	60%

**b) Moderate Risk Appetite:**

Age of Life Assured (years)	Classic Opportunities Fund	Dynamic Bond Fund
0-25	70%	30%
26-35	60%	40%
36-45	50%	50%
46-50	40%	60%
51 onwards	30%	70%

**C) Conservative Risk Appetite:**

Age of Life Assured (years)	Classic Opportunities Fund	Dynamic Bond Fund
0-25	60%	40%
26-35	50%	50%
36-45	40%	60%
46-50	30%	70%
51 onwards	20%	80%

**Strategy 3: Systematic Switching Strategy (SSS)**

If you don't want to get hassled with management of your investment and yet desire the best out of them, you can opt for the Systematic Switching Strategy option that can be chosen at the inception only and will be applicable in the first policy year wherein you can participate in the volatile equity markets in a systematic manner. This option if chosen, allows you to invest in Money Market Fund and transfer a pre-defined amount every month into any one of the following funds:

- 1. Classic Opportunities Fund**
- 2. Frontline Equity Fund**

SSS would be executed by redeeming the required number of units from Money Market Fund at the applicable unit price, and investing the proceeds in the Classic Opportunities Fund or Frontline Equity Fund at the applicable unit price. The transfer is executed automatically at the beginning of the policy month.

**Mechanism for Switching**

A portion of total units available in the Money Market Fund shall be switched automatically into the selected fund i.e. Classic Opportunities Fund or Frontline Equity Fund in the following manner each policy year:

Policy Month 1: 1/12 of the units available at the beginning Policy Month 1

Policy Month t: 1/(13-t) of the units available at the beginning of Policy Month t

Policy Month 12: Balance units available at the beginning of Policy Month 12

Policy Month	1	2	3	4	5	6	7	8	9	10	11	12
Proportion of units transferred	1/12	1/11	1/10	1/9	1/8	1/7	1/6	1/5	1/4	1/3	1/2	1/1

In case you stay invested in this strategy throughout the policy term without switching to any other strategy, you will have an option to exit the market systematically in the last policy year in order to ensure that before maturity your Fund doesn’t get impacted in case of a probable fall in the equity market in the last policy year. This is called **Systematic Exit Strategy (SES)**. During the last policy year, you will have the choice to switch out of the selected fund, i.e. you can move the amount accumulated in either Classic Opportunities Fund or Frontline Equity Fund to the Money Market Fund systematically over a 12-month period, in a similar manner as mentioned above. SES can be availed at the option of the policyholder, either at policy inception or at any time prior to the final policy year.

**Note:** Please refer to *Terms and Conditions Point No. 3 for the other details of the strategies*

**Flexibility to Switch between Funds/Strategies**

Attractiveness of investment depends both on your requirements and on the market conditions. It therefore becomes very important that your plan gives you the flexibility to move your investments from one fund to another or switch your strategies, i.e. between Self-Managed Strategy and Age Based Strategy as per your need and the market conditions. Under this plan you can switch between funds under “Self-Managed Strategy” for 12 times in a policy year for free. You can also switch between the investment strategies i.e. between Self-Managed Strategy and Age Based Strategy; however, preferably each strategy needs to be provided sufficient time to perform and generate good returns, so you are advised to use this flexibility wisely to get the best out of your investment strategy.
